Agenda:

- 1. SQL Server Analysis.**
- 2. Excel Services.**
- 3. Excel workbook.**
- 4. sharepoint list.**
- 5. SQL Server Table.**
- 6. project Overview.**
- 7. Result.**
- 8. Conclusion.**

1. SQL Server Analysis Services:

SQL Server Analysis Services is a tool primarily used by organizations to analyze and make sense of information otherwise spread out, whether over multiple databases or in different tables or files.

2. Excel services:

Excel Services is a service application that enables you to load, calculate, and display Microsoft Excel workbooks on Microsoft SharePoint. Excel Services was first introduced in Microsoft Office SharePoint Server 2007.

3. Excel workbook:

A workbook is a spreadsheet program file that you create in Excel. A workbook contains one or more worksheets. A worksheet (also known as a spreadsheet) consists of cells in which you can enter and calculate data. The cells are organized into columns and rows.

4. SharePoint list:

A SharePoint list is fundamentally a table that includes different cells set out in a rows and columns format. However, within a list the rows are known as list items. Within the columns you can define required different data types such as text, number, date / time and so on.

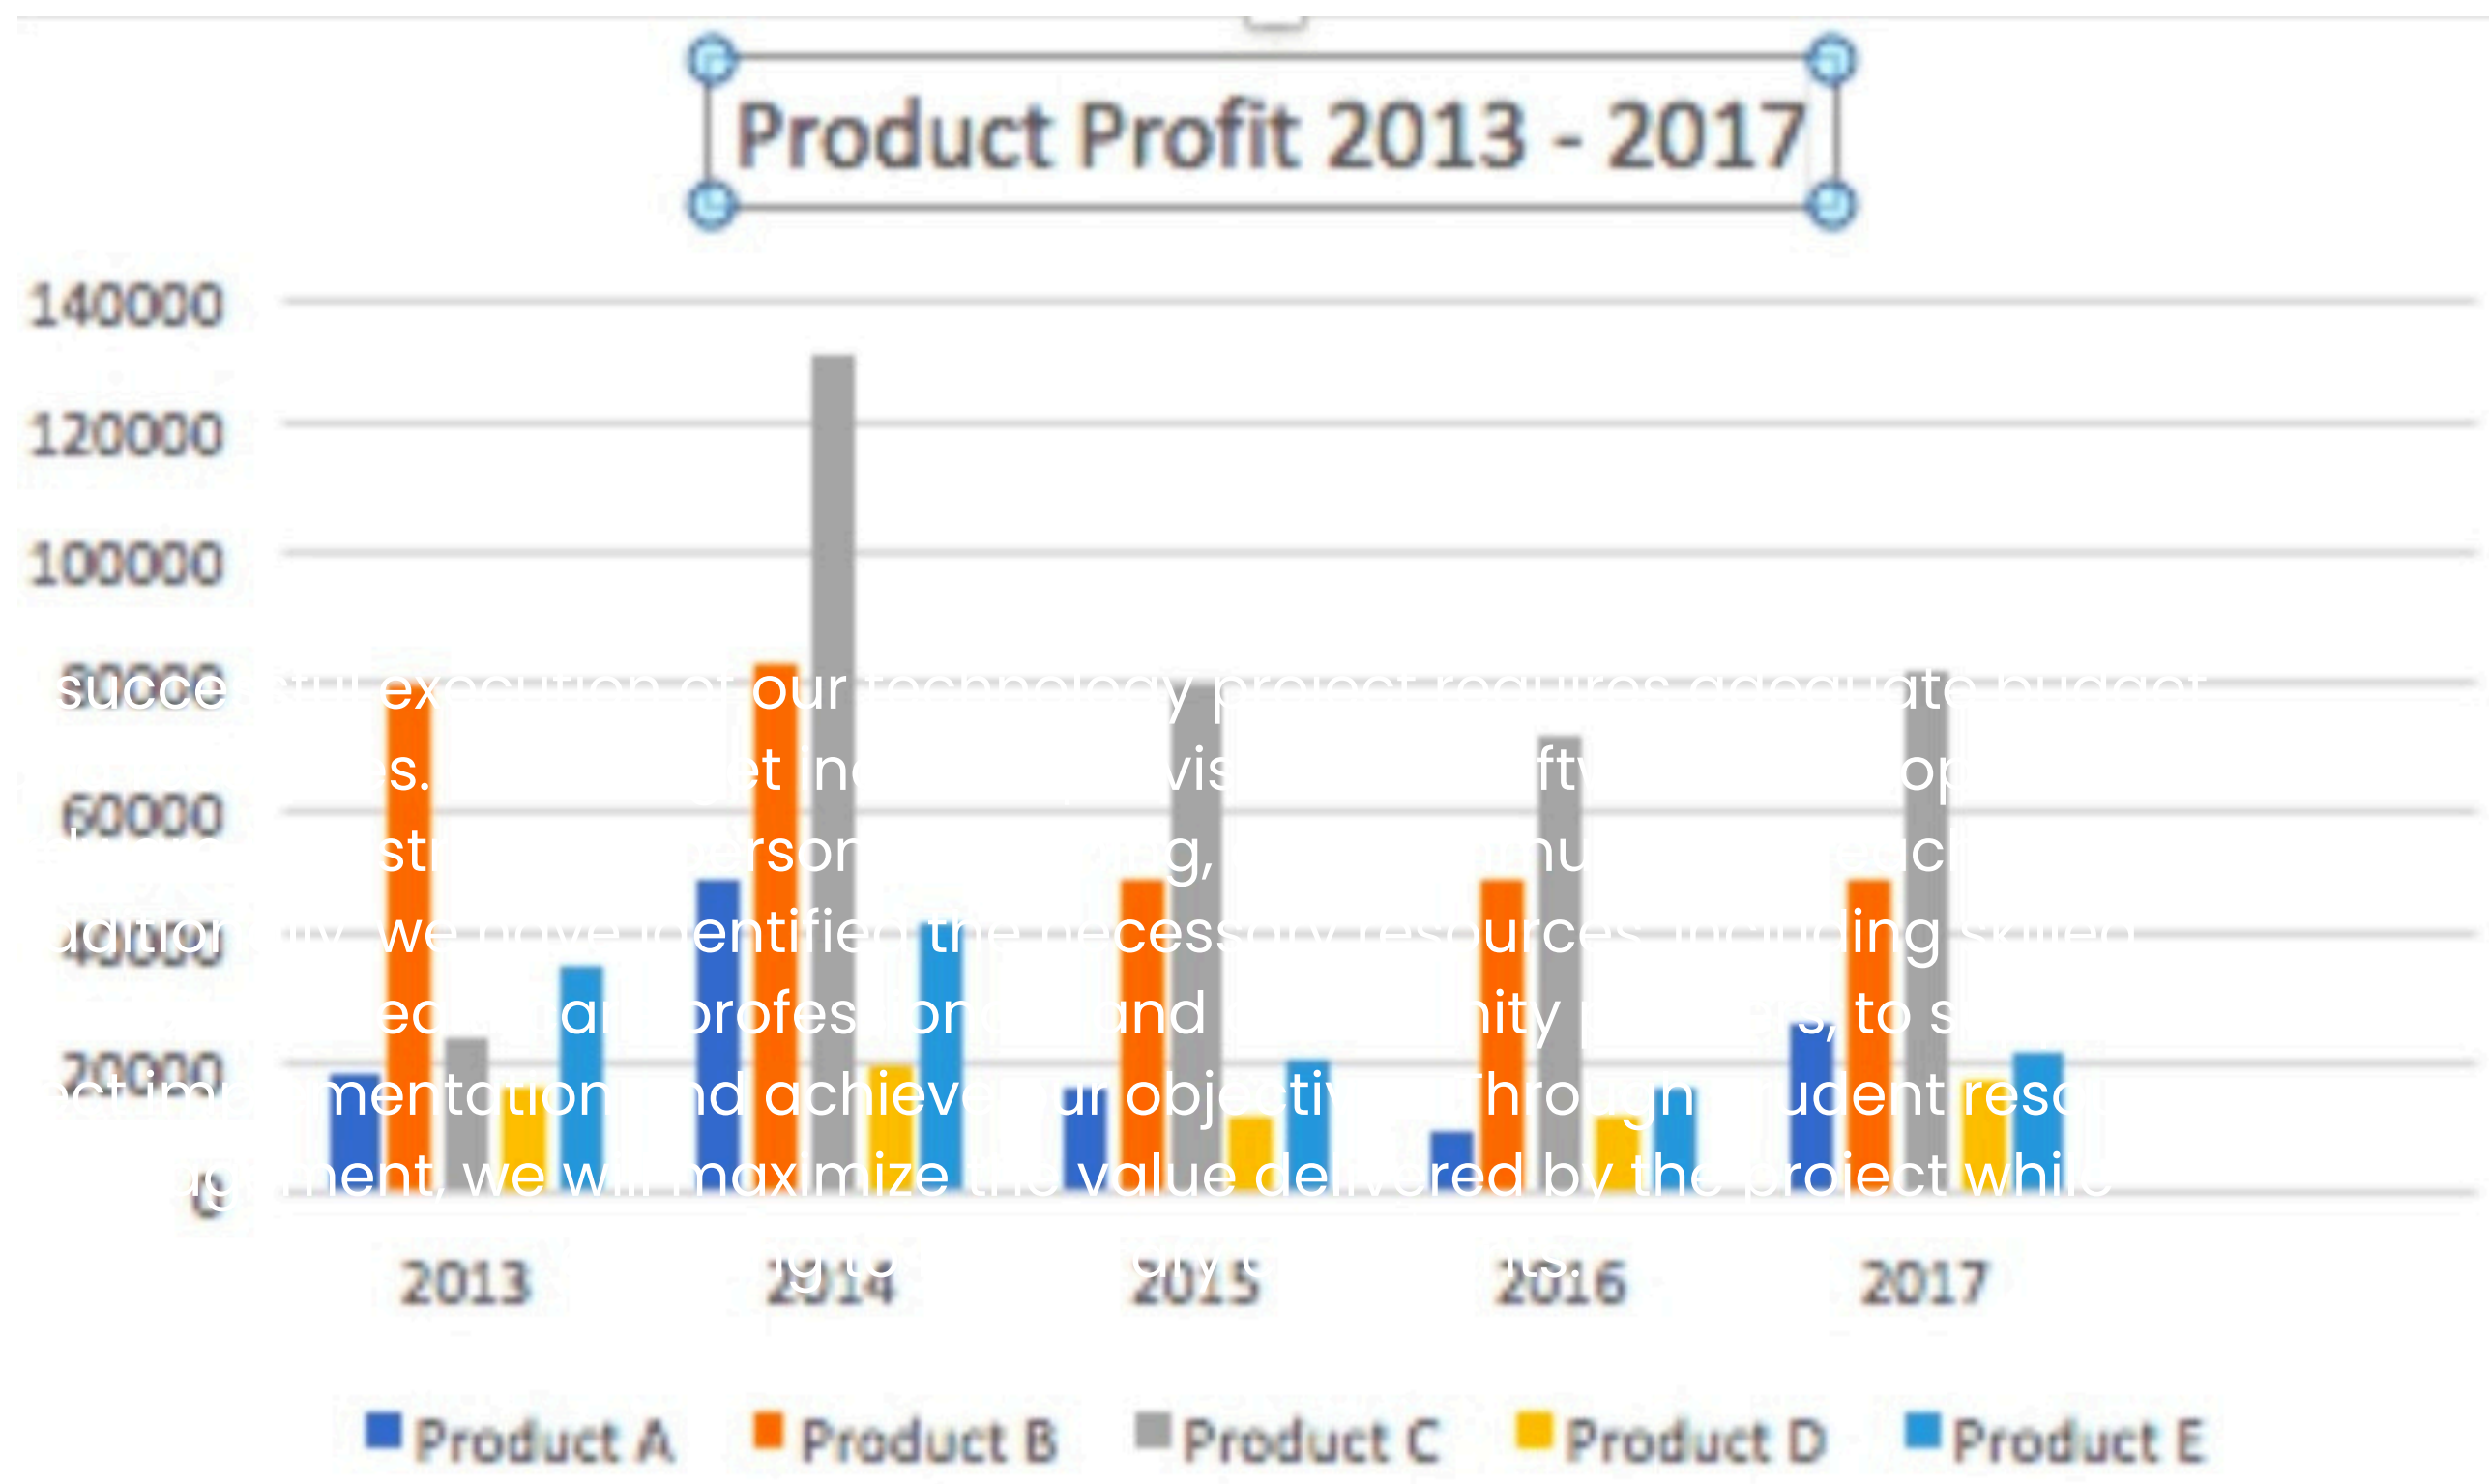

5. SQL server Table:

Tables are database objects that contain all the data in a database. In tables, data is logically organized in a row-and-column format similar to a spreadsheet. Each row represents a unique record, and each column represents a field in the record.

6. Project Overview:

An employee scorecard is a management tool used to monitor an employee's performance. It's the perfect organizational tool because it allows individuals to plan, prioritize, and implement required projects.

7. Result :

8. Conclusion:

An Excel-based Employee Performance Rating Card and Dashboard is very useful and adaptable tool.
